ENRICHING

SMITS onions are practical and professional to use. Our careful cutting process eases the kitchen's workload and adds sophistication to every recipe. However small or large your needs.

PRODUCTION

Humans and machines are inextricably linked in SMITS' production process. This includes excellent working conditions, respect for animals and the environment, and targeted manufacturing.

RAW & PURE

Onions grow best with care and attention: we take care of our farmers, while our farmers take care of their land. Together, and with mutual trust and solidarity, we produce a beautiful product.
